- Cybersecurity
- Software Engineering
- Enterprise Mobility
- Technical Management
- Technical Proposal Services

Cybersecurity

- Ford IT Security understands that our customers need to share information quickly and securely to keep up with the increasing demand on services and therefore we are committed to making sure that happens in a secure manner. Whether you are a Commercial or Government partner our team of Cybersecurity Subject Matter Experts (SME) can help you identify potential security threats, recommend solutions to mitigate those threats, and apply our expertise to your Systems, Networks, and Software Development efforts to ensure the correct implementation of the security technology and controls are in place to protect your business.

- **Ford IT Security Software Offerings**

• Certification and Accreditation	• DIACAP and NIST Artifact Development
• Secure Network and System Design	• Protocol Security Analysis
• Intrusion Detection and Prevention	• Incident and Disaster Response
• Vulnerability Management	• Continuity Planning
• Identity Management	• HIPAA and Privacy Consulting
• Policy Formulation and Compliance	• Information Assurance(IA) Governance
• FEDRAMP	• Cloud Security Services

Software Engineering

- Custom software solutions optimize the delivery of products and services in the modern workplace!

- Ford IT Security offers innovative custom software and software integration solutions to fit their enterprise needs. Whether you are looking to modernize existing software packages, integrate COTS, or need new and unique solutions to innovate the way you deliver your product or services Ford IT Security can help.

Software Engineering
Mobile | Web | Enterprise

- **Ford IT Security Software Offerings**

Mobile Application development for your Apple, Android, or Windows Mobile device. Our team of developers will work with you to identify the "right fit" solution and technology for your mobile application.

We provide **Secure Web** development solutions by reviewing our customers requirements and implementing the correct web technology that meets our customer's needs. Our experts are proficient in Windows, Linux, and numerous web and database technologies to customize the right solution for you.

We provide robust **Enterprise Software** development and custom integration services that are founded on industry best practices for full lifecycle solution development. We have expertise to support your custom defense, health, and mobile IT enterprise development needs. We leverage Agile and CMMI practices to ensure high quality solutions.
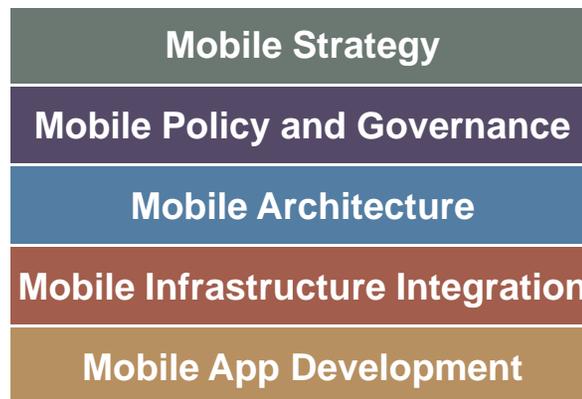

Enterprise Mobility

- Ford IT Security helps our customers realize the benefits of a mobile solution and a mobile workforce. Our approach is codified to allow for Enterprise Mobility to be implemented that is customized and "right fit" to your needs.   Whether you are looking for the development of a Mobile Strategy, Policy and Governance, Mobile Architecture, Mobile Infrastructure Integration, or just simply looking for the development of a Mobile Application we can assist.

Our team is comprised of experts that have the mobile software, network, strategy, and policy experience that allows our customers to quickly and easily devise enterprise solutions that integrate with their mission and needs. Whether you are looking for a Bring Your Own Device (BYOD) solution, in a centralized, decentralized, managed, or unmanaged architecture Ford IT Security will help you identify the right solution for your organization..
